Footnotes to the data file are chosen primarily on the basis of a library's self-reported anomalies. By grouping the footnotes into categories and listing those libraries reporting similar information under each heading, it should be easier to retrieve the information for a specific library.

The libraries are listed by location, and then by legal name of the library if there is more than one library located in that city. The location listing is determined by the mailing address of the library.

1. **CONVERSIONS TO PUBLIC LIBRARY DISTRICT BY APPROVAL OF CORPORATE AUTHORITY**
